

Scientific and Education Committee Report
10-30-2004

Second Annual Renal Pathology Society Satellite Meeting

Location: Hyatt Regency on the Riverwalk
Day and time: Sunday Feb 27, 2005, 1-5:30PM
Room: Chula Vista Room
Arrangements: Seats 80 classroom style with 12 ft ceilings. Full window overlooks Riverwalk with curtains permitting projection. 30 min break with snacks at 3PM
Total cost: \$1,140 (Room and snacks during break)

Meeting Agenda

1.5 hour - Plenary Session
A Primer for Collagen Type IV Nephropathies: Molecular basis, Immunofluorescent Assessment, and Morphometric Evaluation

Two - 15 minute cases presentations

30 minute break

45 min - Research committee activities

1.25 hour - Five 15 minute case presentations

Plenary Session Speakers

Carrie Phillips - Molecular Biology and Genetic Aspects of Collagen Type IV
Helen Liapis - Immunofluorescent Assessment of Renal Biopsies for Alpha 3, 4, and 5 Abnormalities
Mark Haas - Thin Basement Membrane Nephropathy: Morphometric Evaluation

Research Session:

The content of the research session will be determined at the ASN meeting. We need to decide what projects have data to present, and if any new projects merit discussion.

The case presentations:

The format will be presentation of a challenging case in which the diagnosis is unknown to the presenter, or a valuable learning case for society members. The presenter will have 10 minutes to present the case and the biopsy findings (case presentation only, not a mini-didactic). The audience will have 5 minutes for discussion. Contributions from new or junior society members are encouraged. Case should be submitted to me as soon as possible so the committee members can select the cases for presentation. The final version of the case must be received by February 1, 2005. A CD will be created of the plenary session and the case presentations for distribution at the meeting.

Committee Members

Stephen M. Bonsib - Chair
Laura Barisoni
Ian Roberts
